Result oriented IT Engineer with **8+ years** of experience in enterprise infrastructure, cloud services, and technical leadership. I specialize in managing Azure, Intune, and SCCM environments while ensuring seamless network security and business continuity. I bring a unique blend of technical depth and business alignment, with specific expertise in optimizing field sales applications, such as Arla Sales 360, to empower marketing teams and drive operational efficiency. Currently, I am advancing the field of IT operations through published research in AIOps and deep learning-based anomaly detection, focusing on transforming traditional system support into proactive, intelligent maintenance.

Skills and Expertise

Core Skills: • Windows Server Admin (AD, DNS, DHCP) • Azure AD & Intune Deployment • Backup & Disaster Recovery • ITIL • Incident/Change Management • PowerShell/Bash Scripting • Python Scripting • Cybersecurity Analysis • Network Monitoring (PRTG, MRTG) • LAN/WAN • Firewall

Tools and Software Skills: • Microsoft 365 • Linux (Ubuntu/CentOS) • SCCM/MECM • Wireshark • ServiceNow, • Tally Prime • Power Automate • GitHub • MySoft • MacOS • VSCode • Python • Nmap • TeamViewer • RDP • Power Automate • IP-PBX • CCTV & Biometric Systems • SIEM Tools • Field Sales Applications

Professional Experience

Information Technology Officer — **Jan 2025 - continue**

Omnicare Diagnostic Ltd. — Dhaka, Bangladesh

- Deliver Tier 1 & 2 support to 100+ end-users, resolving hardware and networking issues to ensure zero operational downtime.
- Oversee the full IT asset lifecycle for 500+ devices, managing procurement, inventory control, and compliance documentation.
- Reduced procurement turnaround time by 30% by streamlining vendor relationships and financial verification processes.
- Administer MySoft (Hospital Management Software), ensuring seamless billing, patient reporting, and sample documentation.
- Manage the administration and technical support of Field Force (FF) applications, enabling marketing teams to track real-time field activities and ensuring seamless data synchronization.
- Optimized supply chain coordination in Tally Prime, speeding up product requisition approvals by 28%.
- Maintain critical IT infrastructure, including EMR and POS systems, while leading system upgrade rollouts for reliability.
- Enforce enterprise-grade data security through routine backups, endpoint protection, and privacy compliance audits.
- Manage dual WAN connectivity and ISP relationships (LINK3, BDCOM, etc.) to ensure 99.9% network availability.
- Direct IT logistics for corporate health camps, ensuring HMS application stability and optimal remote support.

Technical Support Specialist - Corporate Support — **Jan 2024 - July 2024**

1000fix Services Ltd. — Dhaka, Bangladesh

- Provided end-to-end technical support for Arla Foods' corporate teams, resolving 95% of incidents within strict SLA targets.
- Optimized Microsoft Azure AD, SCCM, and Intune configurations to enhance user security and system deployment speed.
- Identified and resolved network anomalies using PRTG and MRTG, resulting in a 20% reduction in system downtime.
- Administered and supported the Arla Sales 360 field application, ensuring seamless data synchronization and technical stability for marketing and sales operations.
- Guaranteed 100% compliance with IT asset management policies from initial procurement through to end-of-life disposal.
- Partnered with cross-functional IT teams on high-stakes technical projects to improve system integration and incident response.
- Conducted technical training sessions for end-users to reduce recurring support tickets and improve digital literacy.

Sr. IT Support Engineer — **Feb 2021 - Dec 2023**

Entrust Global Ltd. / e-TEK Solutions — Dhaka, Bangladesh

- Supported a high-priority G2G (Government-to-Government) project, resolving complex technical escalations via ServiceNow.
- Maintained a 90% first-call resolution rate while successfully reducing the overall ticket backlog by 25%.
- Conducted Root Cause Analysis (RCA) on high-frequency incidents, implementing fixes that cut recurring issues by 30%.
- Administered hybrid infrastructure spanning on-premises servers and Azure resources, optimizing uptime and security.
- Mentored and trained junior engineers in ITIL-compliant service management, significantly improving team efficiency.
- Analyzed system logs and performance metrics to proactively remove network bottlenecks and enhance reliability.

Professional Experience

IT Engineer **Dec 2017 - Dec 2020**
M/S Shahin International Dhaka, Bangladesh

- Maintained software and OS updates, improving the overall security posture and system performance of the organization.
- Diagnosed and resolved hardware/network issues for 100+ users, maintaining a consistent 98% system uptime.
- Monitored network traffic and logs to proactively identify bottlenecks, reducing packet loss and improving service quality.
- Created and maintained technical documentation, asset inventories, and change logs to support IT audits.
- Supported CCTV systems, biometric attendance devices, and other IT peripherals, ensuring core network integration.
- Provided high-level on-site and remote support, ensuring high user satisfaction through rapid incident resolution.

Sr. Business Development Executive **Feb 2017 - Nov 2017**
M/S Shahin International Dhaka, Bangladesh

- Aligned organizational goals with a 3-year strategic vision, achieving an 85% goal attainment rate.
- Boosted online presence by 25% through strategic social media management and digital content updates.
- Monitored facility environmental performance and recommended funding levels for infrastructure spending.

Assistant IT Engineer **Jan 2016 - Jan 2017**
GrameenPhone Ltd. Dhaka, Bangladesh

- Executed the installation, configuration, and troubleshooting of computer hardware, software, and peripheral devices.
- Assisted 200+ users with technical issues across multiple departments, maintaining a 90% user satisfaction rate.
- Monitored system performance and identified potential hardware failures proactively to prevent data loss.
- Maintained an organized IT asset database and inventory, ensuring all equipment was tracked and accounted for.
- Assisted in the deployment of OS patches and software updates across the corporate network to maintain security.
- Collaborated with senior engineers to document common technical issues and resolutions for the internal knowledge base.

PUBLICATIONS & RESEARCH

- Leveraging Acoustic Side-Channel Analysis for Predictive Hardware Maintenance – Journal Article, Mar 2026.
- Automated Anomaly Detection in Cloud Microservices Using LSTM Autoencoders – Preprint, Feb 2026.
- Unsupervised Anomaly Detection in Microservice Telemetry: Identifying Silent Failures – Publication, Feb 2026.

Projects

Automated Log Analysis & Threat Detection Tool
A high-performance Python security tool for SSH brute-force detection that utilizes Regex and file-streaming to process large-scale logs securely, incorporating automated incident reporting and robust protection against path traversal.

Educational Background

Bachelor of Science (BSc) in EEE **May 2017**
Major in Information Technology Dhaka, Bangladesh
University of Information Technology & Sciences

Certifications

- Google Cybersecurity Professional Certificate - MikroTik Certified Network Associate (MTCNA)
- CompTIA A+ (1000 Part 1 & 2) - Google IT Support Professional - Data Analysis and Visualization Foundations.
