Information Technology Engineer with **9+ years** of experience in enterprise infrastructure, endpoint security, identity management, and IT operations. Hands-on expertise administering Azure AD/Entra ID, Intune, SCCM, and Active Directory across 500+ assets. Proficient in network monitoring, incident remediation, backup/disaster recovery, and security compliance documentation. Certified in Google Cybersecurity, CompTIA A+, Google IT Support, and MTCNA, with technical skills in Python-based threat detection, log analysis, and anomaly detection research.

Skills and Expertise

Core Skills: • Windows Server Admin (AD, DNS, DHCP) • Azure AD & Intune Deployment • Information Security Operations • Root Cause Analysis • ITIL • Incident/Change Management • PowerShell/Bash Scripting • Python Scripting • Cybersecurity Analysis • Network Monitoring (PRTG, MRTG) • LAN/WAN • Firewall • Identity & Access Management • Network Security

Tools and Software Skills: • Microsoft 365 • Linux (Ubuntu/CentOS) • SCCM/MECM • Wireshark • ServiceNow, • Tally Prime • Power Automate • GitHub • MySoft • MacOS • VSCode • Python • Nmap • TeamViewer • RDP • Power Automate • IP-PBX • CCTV & Biometric Systems • SIEM Tools • Field Sales Applications • Asset Management • Technical Documentation • Log Analysis

Professional Experience

Information Technology Officer — **Jan 2025 - continue**
Omnicare Diagnostic Ltd. — Dhaka, Bangladesh

- Secured and managed 500+ corporate IT assets through centralized endpoint management, lifecycle controls, inventory tracking, and compliance documentation.
- Enforced endpoint security, automated backups, and regular security-focused audits to strengthen data integrity, availability, and privacy compliance.
- Maintained 99.9% network uptime for 100+ users through dual-WAN management, infrastructure monitoring, ISP coordination, and proactive troubleshooting.
- Delivered Tier 1 and Tier 2 technical support for hardware, networking, systems, and security-related incidents across the organization.
- Maintained critical HMS, EMR, POS, and business applications, identifying and resolving operational and data-flow issues affecting business processes.
- Administered Microsoft-based endpoint and identity environments with emphasis on secure device management and controlled access.
- Managed vendor relationships and technology procurement processes while maintaining appropriate documentation and financial verification controls.
- Governed the complete lifecycle of 500+ enterprise IT assets, supporting accountability, security, inventory accuracy, and compliance tracking.
- Administered Field Force marketing software and supported secure data synchronization for distributed users.
- Directed IT infrastructure and network staging for remote corporate health camps, maintaining application availability and operational continuity.
- Built and deployed a Python-based internal network application for centralized corporate advertising across company displays.
- Configured and deployed a Linux-based call-center server to support controlled inbound call handling and routing.

Technical Support Specialist - Corporate Support — **Jan 2024 - July 2024**
1000fix Services Ltd. — Dhaka, Bangladesh

- Delivered enterprise technical support for Arla Foods corporate users, resolving 95% of incidents within SLA requirements.
- Optimized Azure AD, SCCM, and Microsoft Intune configurations to improve endpoint security, identity administration, and deployment efficiency.
- Investigated network anomalies using PRTG and MRTG, contributing to a 20% reduction in system downtime.
- Supported incident investigation and remediation across endpoint, network, application, and identity-related environments.
- Implemented automated backup and disaster recovery protocols across core servers to strengthen business continuity and data protection.
- Maintained 100% compliance with IT asset management policies from procurement through end-of-life disposal.
- Supported Arla Sales 360 infrastructure and application operations, maintaining secure and reliable data synchronization.
- Partnered with cross-functional IT teams on technical projects involving system integration and incident response.
- Conducted technical training for end users to reduce recurring incidents and improve security-aware technology usage.

mustaquimmahmad@gmail.com

Sr. IT Support Engineer
Entrust Global Ltd. / e-TEK Solutions
Feb 2021 - Dec 2023
Dhaka, Bangladesh

- Supported a high-priority Government-to-Government technology environment, resolving complex technical escalations through ServiceNow.
- Maintained a 90% first-call resolution rate while reducing the overall incident backlog by 25%.
- Conducted Root Cause Analysis (RCA) on recurring incidents and implemented corrective actions that reduced recurring issues by 30%.
- Administered hybrid infrastructure spanning on-premises servers and Microsoft Azure, with emphasis on availability, security, and operational resilience.
- Analyzed system logs and infrastructure performance metrics to identify network bottlenecks, abnormal behavior, and reliability issues.
- Supported ITIL-based incident, change, and service management processes.
- Mentored junior engineers on structured troubleshooting, incident management, and technical service practices.
- Maintained technical documentation and incident knowledge to support consistent remediation and operational governance.

IT Engineer
M/S Shahin International
Dec 2017 - Dec 2020
Dhaka, Bangladesh

- Standardized user access controls and Active Directory permissions to reduce security exposure and streamline secure employee onboarding.
- Diagnosed and resolved infrastructure, hardware, software, and network incidents for 100+ users, maintaining approximately 98% system uptime.
- Monitored network traffic, system logs, and infrastructure performance to identify bottlenecks and potential security/reliability issues.
- Maintained technical documentation, asset inventories, and change logs to support IT audits and governance requirements.
- Maintained operating-system and software updates to strengthen system security and performance.
- Supported CCTV, biometric attendance, and peripheral systems while maintaining integration with core IT infrastructure.
- Performed preventive maintenance and infrastructure performance tuning to reduce equipment failure risk.
- Provided on-site and remote technical support with rapid incident resolution.

Assistant IT Engineer
GrameenPhone Ltd.
Jan 2016 - Jan 2017
Dhaka, Bangladesh

- Installed, configured, and troubleshot enterprise hardware, operating systems, applications, and peripherals.
- Supported 200+ users across multiple departments while maintaining approximately 90% user satisfaction.
- Monitored system performance and identified potential hardware failures to reduce operational and data-loss risks.
- Maintained IT asset databases and inventory records for accountability and tracking.
- Assisted with enterprise OS patching and software updates to maintain security and system reliability.
- Created technical knowledge documentation covering common incidents and remediation procedures.

Projects

Automated Log Analysis & Threat Detection Tool - Python | Security Automation | Threat Detection
Built a Python-based security tool using regex log analysis and file streaming to detect SSH brute-force activity from large-scale system logs. Integrated automated incident reporting and path-traversal protection mechanisms to streamline real-time threat identification.

OctaGuard Prime: Enterprise Endpoint Security Suite - Next.js | Node.js | Python | Endpoint Security | RBAC
Engineered a multi-tier endpoint security platform featuring real-time USB monitoring with 1-second polling and automated offline lockdown capabilities. Implemented role-based access control (RBAC) and detailed forensic logging to enforce centralized device management and post-incident investigations.

Publications & Research

- Leveraging Acoustic Side-Channel Analysis for Predictive Hardware Maintenance – Journal Article, Mar 2026.
- Automated Anomaly Detection in Cloud Microservices Using LSTM Autoencoders – Preprint, Feb 2026.
- Unsupervised Anomaly Detection in Microservice Telemetry: Identifying Silent Failures – Publication, Feb 2026.

Certifications

- Google Cybersecurity Professional Certificate - MikroTik Certified Network Associate (MTCNA)
- CompTIA A+ (1000 Part 1 & 2) - Google IT Support Professional - Data Analysis and Visualization Foundations.

Educational Background

Bachelor of Science (BSc) in EEE - Major in Information Technology
University of Information Technology & Sciences
May 2017
Dhaka, Bangladesh
